

Value Scales

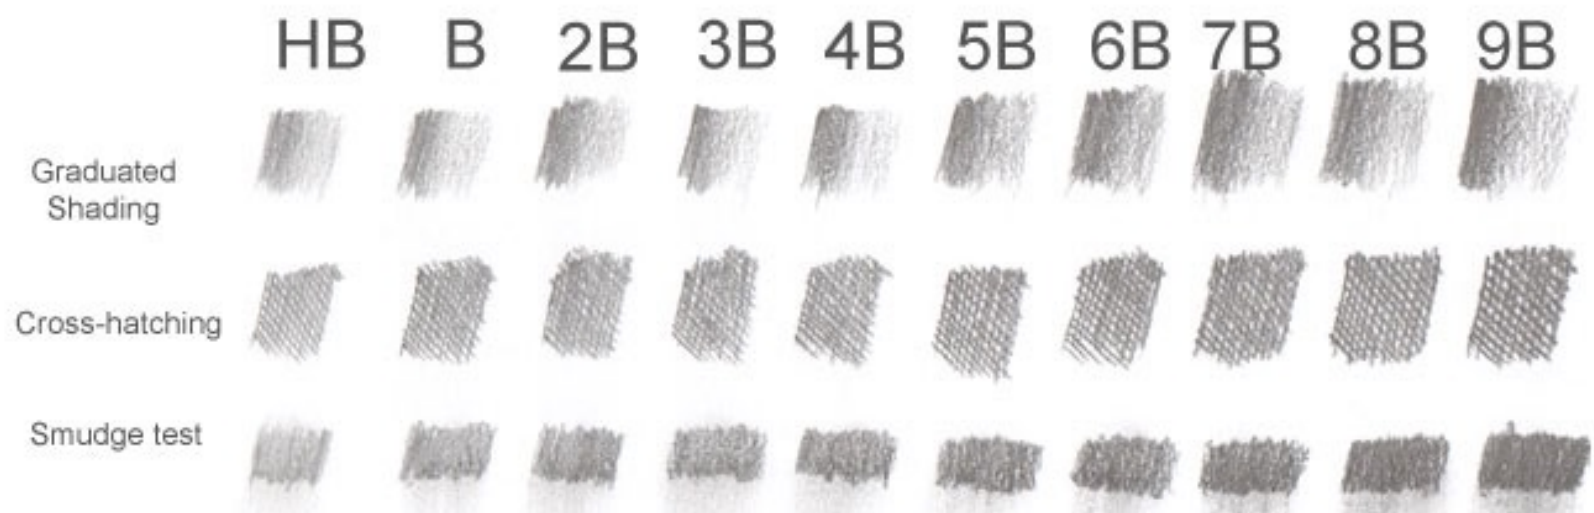

Texture and Mark Making

Value Scale with Graphite

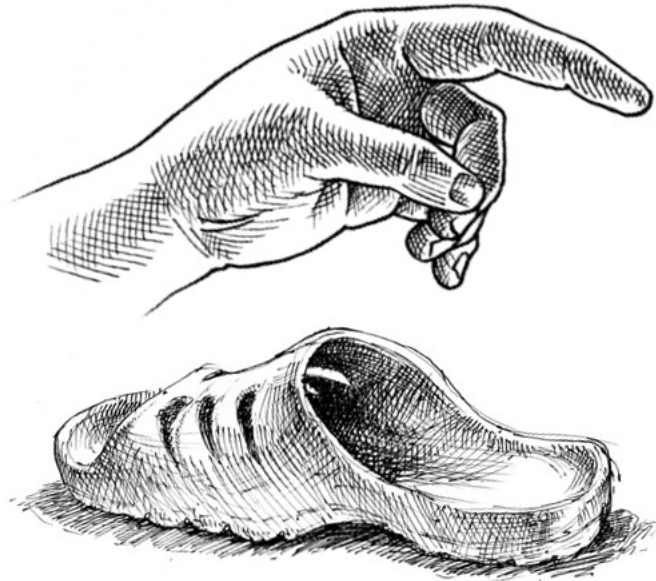

H = harder & B = Softer

What is Crosshatching?

: to mark with two series of parallel lines that intersect

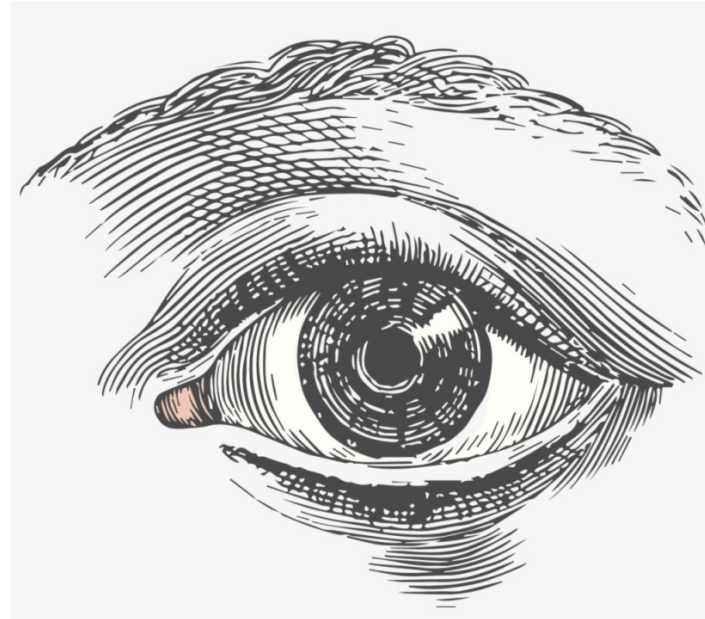

Cross-hatching uses lines that cross

Uses lines that cross on two or more directions.

These types of shading are used in ink drawings and some kinds of printing techniques.

These lines imply form.

Sketchbook Assignment

- Create one 9 inch value scale in pencil
- Create 9 different TEXTUAL patterns
- Choose TWO from those
- Then make two different value scales with them, each value scale must also be 9 values.
- In the end you will have three very clearly different 9 inch value scales.
